

### Inventory Checklist

This document is to help guide you with capturing the inventory and quantity of items that needs to be housed in the various spaces, so your design is laid out accordingly. Also, it is important that you capture the dimensions of the said items if it's larger and or unconventional. For example, client wants their own baskets/bins housed onto shelves. *Make sure to get the **height, width and depth** of the appropriate baskets/bins and other items.*
